Full-stack engineer with 10+ years of experience building newsroom platforms, geospatial systems, and operational infrastructure serving millions of users. Shipped an ML-driven paywall (+22% conversion, +15% subscription starts) and single-page subscription checkout (+14% digital subscriptions) at The Dallas Morning News. Experienced in React, Node.js, Python, GIS pipelines, experimentation systems, and distributed integrations spanning subscriptions, mapping, analytics, and real-time operational workflows.

PROFESSIONAL EXPERIENCE

The Dallas Morning News / Hearst, Dallas, Texas

Senior Full Stack Developer

May 2025 - Present

- Integrated Sophi's ML-driven paywall into Arc XP subscription flows with GA4, BlueConic, feature flags, and kill switches; contributed to +22% conversion and +15% subscription starts.
- Architected and maintained high-traffic newsroom systems using React, Node.js, GraphQL, Python, and Arc XP to support publishing, subscriptions, personalization, and advertising workflows serving millions of readers.
- Designed deterministic identity-state resolution and unified onboarding systems across BlueConic, Sailthru, Braintree, Stripe, and Apple Pay, eliminating paywall-to-checkout drop-offs and reducing acquisition-to-retention friction.
- Supported rollout governance, release coordination, monitoring, observability, and zero-downtime deployment practices through feature flags and production safeguards across distributed systems.

Full Stack Developer

November 2021 – April 2025

- Rebuilt a fragmented 3-page subscription checkout into a single React-driven flow with unified Braintree, Stripe, and Apple Pay orchestration; drove +14% digital subscriptions in month one and sustained +7% uplift through production UX iteration.
- Instrumented Microsoft Clarity session analysis and behavioral heat maps to identify UX bottlenecks and guide evidence-driven checkout improvements.
- Helped rebuild the 2022 Local Elections Hub into a shared React and Arc XP platform for live election results, county-level navigation, lightweight data visualization, and mobile-first newsroom publishing during election-night coverage.
- Improved reader engagement through integrated commenting and interaction systems (Viafoura), contributing to +38% engagement growth across enabled content.
- Extended Arc XP CMS automation and newsroom integrations, reducing manual editorial effort and accelerating publishing workflows.
- Designed RESTful APIs bridging CMS, subscription, identity, and payment systems; deployed through AWS-backed CI/CD pipelines with automated monitoring and operational safeguards.

I GEAR GEEK co., ltd., Chiang Mai, Thailand

Data Engineer

May 2020 – March 2021

- Built automated ETL pipelines using Python, AWS, MongoDB, and MySQL for customer-data ingestion, validation, and reporting workflows, improving marketing data quality and reducing manual processing across campaign operations.
- Developed cloud-backed reporting infrastructure across DynamoDB, MySQL, and MongoDB to support fault-tolerant analytics pipelines, operational monitoring, and SLA-driven reporting workloads.
- Designed backend workflows for customer segmentation, campaign reporting, and data synchronization across distributed marketing systems.

Provincial Electricity Authority, Bangkok, Thailand

Full Stack Developer II

July 2016 – July 2019

- Built GIS and ETL pipelines (ArcGIS, Oracle, field devices) feeding real-time operational dashboards and outage-management workflows across Thailand's provincial power network.
- Developed APIs and integration services (REST/SOAP, C#, Laravel, Python) connecting OMS, GIS, SAP ERP, and operational systems to synchronize outage lifecycle data, restoration timing (ETR), and reporting workflows.
- Optimized Oracle PL/SQL stored procedures and enterprise batch-processing jobs, improving performance and reliability across large-scale utility billing and operational systems.
- Built operational web and mobile interfaces for outage visibility, field coordination, and real-time energy monitoring across high-volume public utility platforms.
- Supported production integration work alongside utility operations teams and third-party implementation partners during deployment, synchronization debugging, and outage-response coordination.

THiNKNET Co., Ltd., Bangkok, Thailand

Senior Software Engineer

August 2015 – June 2016

- Integrated Elasticsearch into a high-traffic job search system, improving query performance and ranking relevance at scale.
- Geospatial platform (MapMagic): designed APIs and data pipelines to process ~2M+ GIS records into structured location-based search and mapping services.
- Built location-based job discovery features on OpenStreetMap, enabling geographic and proximity-based search.
- Developed interactive geospatial visualizations using Laravel, D3.js, and modern JavaScript, improving map usability and location-based discovery.
- Built resume creation and employer tools, streamlining hiring workflows across one of Thailand’s largest recruitment platforms.

EDUCATION

- **Texas Tech University**, Lubbock, Texas, USA December 2020
Master of Science in Computer Science **GPA: 3.33**
- **King Mongkut's University of Technology Thonburi (KMUTT)**, Bangkok, Thailand June 2014
Bachelor of Engineering in Computer Engineering **GPA: 3.33**
Second class Honors
- Additional Education:** M.S. in Technopreneurship (Institute of Field Robotics), KMUTT (Sep 2018) **GPA: 3.75**
B.B.A. in Marketing, Sukhothai Thammathirat Open University (Nov 2017)

SKILLS/AWARDS

- **Technical Skills**
 - **Languages:** JavaScript, TypeScript, Python, PHP, C#, SQL, HTML/CSS
 - **Frameworks & Libraries:** React, Node.js, GraphQL, Laravel, Django, .NET, Tailwind CSS, D3.js
 - **Data & GIS:** PostgreSQL, MySQL, MongoDB, Oracle PL/SQL, Elasticsearch, ArcGIS, OpenStreetMap
 - **Cloud & DevOps:** AWS (EC2, Lambda, S3, CloudFront), Docker, Jenkins, GitHub Actions, CI/CD
 - **Analytics & Platforms:** Arc XP, Sophi, BlueConic, Sailthru, GA4, Looker Studio, Power BI
 - **Research & Engineering:** MATLAB, C
- **Licenses & certifications**
 - [Selenium](#)
 - [Test Automation Foundations](#)
 - Google Analytics 4 (GA4) Certification: [Data Analysis](#), [Reporting](#), and [Integration](#)
- **Awards**
 - **INMA Global Media Awards**, 3rd Place - Advertising Sales & Retention (2024)
[Digital Replica Revenue Growth to Future-Proof Local Journalism](#), The Dallas Morning News
 - **INMA Global Media Awards**, Best Product Iteration Finalist (2023)
[LocalGraf: Internal Database Linking From Inside Stories](#), The Dallas Morning News
 - **J.T. and Margaret Talkington Graduate Fellowship** (2019-2020), Texas Tech University
 - **Petchra Prajomklao Graduate Scholarship** (2015-2017), King Mongkut’s University of Technology Thonburi
 - **Honorable Mention**, Young Technopreneur Innovative Business Plan Development Competition (2018), awarded by SAMART Group and NSTDA, Thailand
 - **2nd Runner-up**, My Hometown International Photography Exhibit (2020), Texas Tech University

PROJECTS

- **On Simulating Energy Consumption of Federated Learning Systems** 2020
MATLAB simulation of federated learning energy use under NOMA; analyzed compute vs. radio tradeoffs for distributed AI workloads.
- **Development of Logistics Evaluation System for Industrial Thailand Performance** 2018
Created a decision-support system using causal loop modeling to evaluate Thailand's LPI dimensions; outcomes applied as policy guidelines for national logistics improvement.
